

DEKU LINK

By Xenon

Notes:

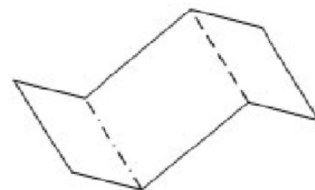

This is a template made using a model from a 3DS game. These are more detailed than N64 models so I have increased the scale slightly to avoid unnecessarily small parts. Though it may be small, it has enough to be built in the smooth method if you want to do so. This is where you ignore most fold lines apart from the tabs and angular areas.

Being small but detailed I recommend a paper thickness of about 120-180gsm, though you could go thinner if that is your preference. Remember, thick paper is strong but leaves visible edges and overhangs. Thin paper creates less visible seams, but does not give much strength to hollow shapes.

Part Letter List:

- A: 1-18 Arms and Hands
- B: 1-11 Body
- H: 1-23 Head
- L: 1-14 Legs

Mountain Fold

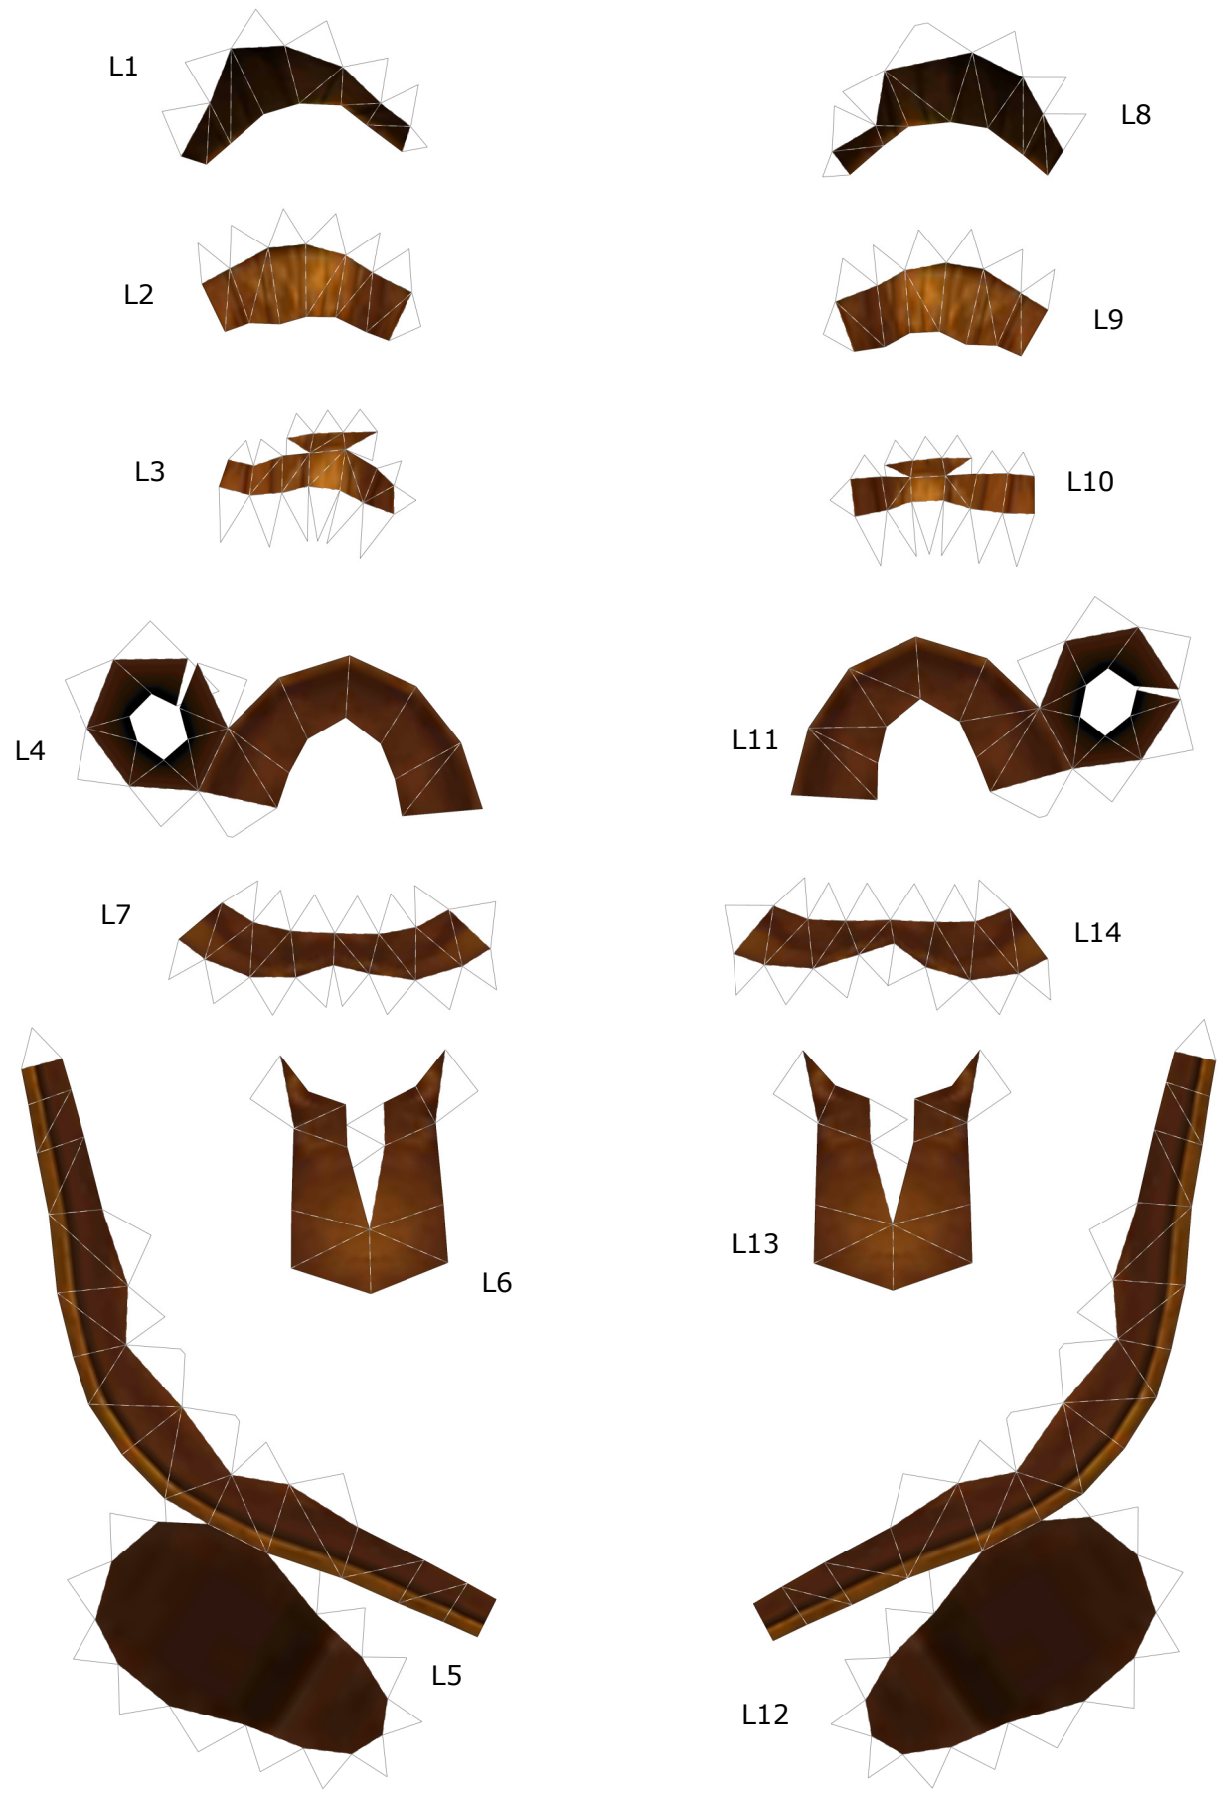

Valley Fold
